Account & Data Deletion

Vicinity World, Inc. Last Updated: July 27, 2026

You can permanently delete your Vicinity World account and its associated data at any time. Deletion is available directly inside the app, and by request if you can no longer access your account. This page describes both paths and exactly what is deleted.

1. Delete Your Account In the App (Fastest)

Deletion is self-service and takes effect immediately:

- Open the Vicinity World app (iOS, Android, or web at vicinity.world).
- Go to **Settings** → **Account**.
- Choose **Delete Account** and confirm.

Only you can delete your account: the action requires you to be signed in and to confirm the deletion.

2. Request Deletion by Email

If you can no longer sign in (for example, you lost access to your email address or device), you can request deletion by contacting us at admin@vicinity.world from any address, with the subject line "Account Deletion Request." Include the email address or mobile number your account was registered with. We will verify that the request comes from the account owner before deleting, and confirm once the deletion is complete. Requests are processed within 30 days, typically much sooner.

3. What Is Deleted

- **Profile and account data:** name, contact details, profile photo, biographical information, and sign-in identifiers (including Google/Apple sign-in links).
- **Saved locations and visibility settings:** addresses, privacy rules, and location-sharing configuration.
- **Your content:** service listings, posts, and reviews you created.
- **Sessions and devices:** all signed-in sessions and notification registrations are revoked.
- **Payment resources:** payment methods, payout accounts, and identity-verification records held with our payment providers are disconnected and removed on your behalf.

4. What May Be Retained

We retain a limited subset of records where the law requires it or where they are necessary for legitimate business purposes: completed transaction and payout records (financial and tax compliance), records of policy violations, and messages you sent to other users (which remain part of the recipient's conversation history, no longer attributed to an active account). Retained records are kept only as long as necessary and are not used for any other purpose.

5. Contact Us
